"A Case for Trauma Informed Care Across Healthcare Settings"

Rachel Ashcraft MS, OTR/L, TBRI® Practitioner (she/her) is a licensed and registered occupational therapist whose scholarly and clinical work primarily centers around Trauma Informed policies, research, and practice.

Join us as she discusses the rationale for the incorporation of trauma informed approaches at both individual and system levels across all healthcare settings.

Participants will be able to define ACES and link connection to risk factors across the lifespan, identify the 6 principles of Trauma Informed Care as defined by SAMHSA, and describe how a person's past history can impact health outcomes and guide healthcare interactions.
